Full Stack Engineer with experience building scalable web applications across frontend and backend. Focused on writing clean, maintainable code and delivering reliable, user-friendly features. Experienced in developing frontend interfaces, building and integrating backend services, working with APIs, and supporting end-to-end application flows. Comfortable taking ownership of features, collaborating with cross-functional teams, and delivering production-ready solutions across the stack.

EXPERIENCE

SCALEUP WORKS,
Full Stack Developer

Florida, USA
Remote 2023 – Present

- **Develop user-facing web applications and reusable UI components**, built responsive and maintainable web interfaces using React and TypeScript.
- **Develop and integrate backend APIs with frontend and contribute to server-side logic**, worked closely with backend engineers to consume RESTful APIs, implemented Node.js and Express features.
- **Support cloud-based deployments and optimize application performance**, deployed applications on AWS, monitored and resolved performance bottlenecks, and applied best practices for scalability.

PROJECTS

STUDENT STORAGE – WEB APPLICATION (<https://studentstoragepros.com>)

Full-Stack / Frontend Engineer

- **Developed a responsive web platform for students** to book and manage storage solutions using React and TypeScript
- **Built and integrated backend services with Node.js and Express**, including booking management, authentication, and payments
- **Connected frontend and backend via RESTful APIs** and implemented modular, reusable components

EDUMATE – LMS PLATFORM (<https://student.edumate.work>)

Final Year Project

- **Developed a responsive web platform for students** to book and manage storage solutions using React and TypeScript
- **Integrated frontend with backend APIs** and implemented reusable components for scalable, maintainable architecture
- **Deployed on AWS**, optimized performance, usability, and cross-device accessibility
